Common Area Seating System  
公共座椅系统解决方案

**MINKUANG**, A high reputation seating brand of LK Furniture Industries, we have in-house designers react quickly to consumer tastes

and have conquered the ability to make style and selection affordable.

Talented and ambitious, they travel the world to gain an understanding of the latest trends and discover emerging materials, constructions and technologies

Mastering the art of collaboration, they work closely with multiple departments to ensure products are produced efficiently. This approach contributes to LK Furniture Industries ease of manufacturing, cost control, and speed to market.

民匡家具的设计师和工程师们对市场反应迅速在引领潮流的同时又能很好的控制成本  
我们有国际化的设计团队  
使得我们能够准确掌握产品趋势  
他们从全球发掘新型材料，结构以及技术

民匡真正理解了合作的艺术  
设计师的责任不再只停留在纸上  
他们和各个部门配合密切  
以确保每一件所生产的产品  
能够以设计的效果呈现

设计师和车间协同工作的方式  
让民匡受益匪浅  
所以，  
我们能够轻松应对质量和成本控制  
同时，确保了我们的速度优势

多功能空间解决方案

At Minkuang, we specialize in maximizing the utility and versatility of spaces. Our wide selection of sophisticated movable seating solutions ensures that your space can easily transition from a seated arrangement to a fully open area for diverse activities.

我们专注于最大化空间的实用性和多功能性。  
提供多种灵活的，可移动的，座椅收纳解决方案，  
确保您的空间能够轻松从座椅布局转变为完全开放的区域，  
以适应各种活动需求。

## MUF

### MINKUANG UNDER FLOOR SMART SOLUTION

The MUF system is a smart seating system that free up the space by storing groups of seats under the floor.

Its design is based on the construction of a frame in which all the mechanisms and systems that define the movement are integrated.

The structure is made up of several elements. A frame made of steel tube; a set of plates with specific machining; and the hinges or articulations that accompany the movement of the covers.

The opening and closing of the covers and the raising and lowering of the seats are carried out automatically by means of electric motors.

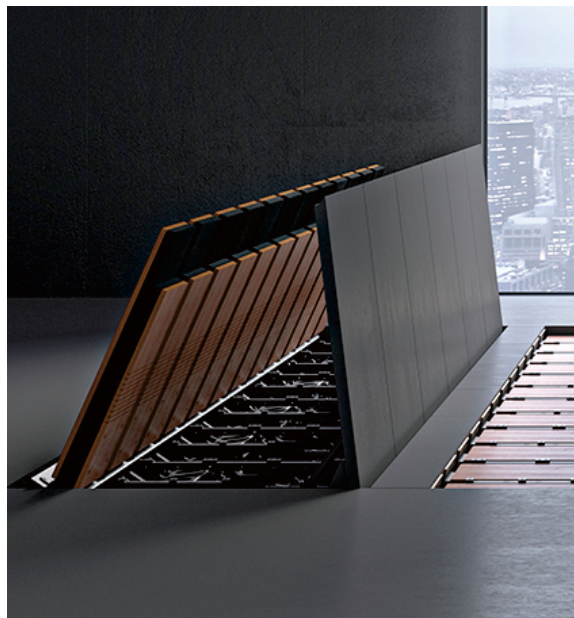

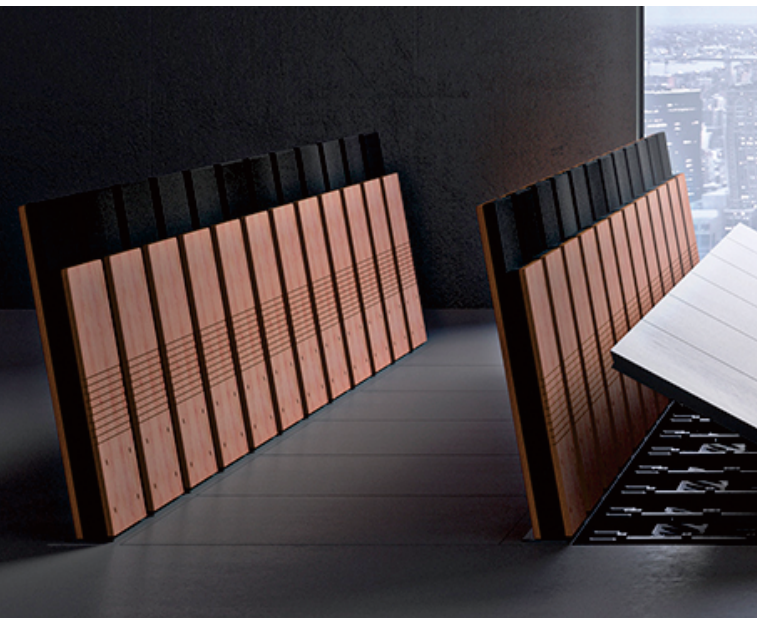

It is an ideal product for use in all types of facilities. Auditoriums, Theatres, Meeting Rooms and Multifunctional Spaces. Its design, characteristics and ease of use make the MUF a product that only requires a minimum of annual maintenance, thus guaranteeing a high level of useful life for the system.

The MUF modules can be installed in flat and non-sloping spaces, on mechanical lifting platforms and on the platforms of telescopic stands.

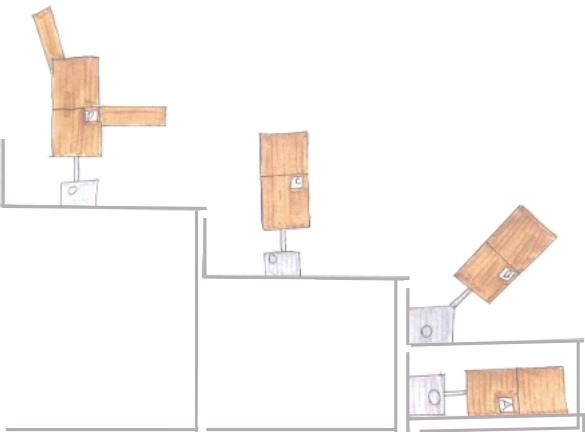

# MTS

## MINKUANG TELESCOPIC SYSTEM

MRS is a Telescopic Seating system allows the seats to be moved out of sight into the walls by means of a telescopic compaction system.

It offers high stability and is designed to international standards. This tiered seating system features an efficient folding and unfolding mechanism.

It is well-suited for demanding public seating areas including theatres, schools, universities, arenas, and multipurpose spaces, providing a practical solution for versatile seating needs.

The opening and closing movements of the tier platforms is automatic by a remote push-button controller. Once the Retractable Seating System is opened, the seat rows will be folding / unfolding row by row.

This raised process can be automatic, semiautomatic or manual. With a wide choice of seat options, ultimate flexibility and low maintenance.

Our retractable seating system may be equipped with all types of seats; the most frequent ones are the LK-902, TULIP S, LK-8288 and Type L, models which are compact and therefore easy to store.

MINKUANG  
SLIDING  
SYSTEM

MSS *LEGOX*

MSS - The Minkuang Sliding System lets you move the seats manually on tracks built into the floor so you can move and store them under the stage or in suitable storage premises after use. It can be used with the Lego X , LK-902 and customised according to the project needs. It suits spaces requiring different configurations, like auditoriums, theatres, and performing arts centres.

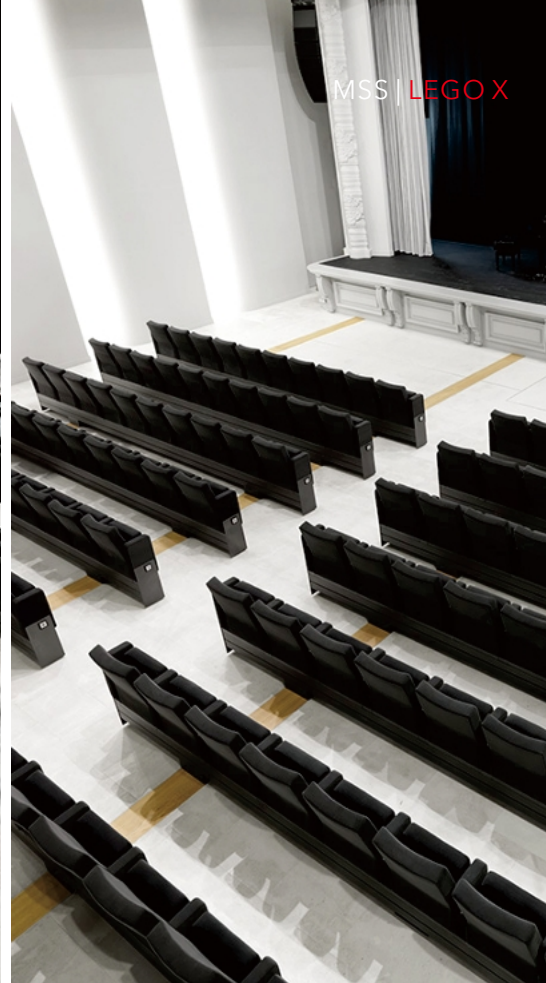

The system design allows the sequential and individual movement of the rows, thus granting great versatility to the room to be able to configure the seating capacity desired at any time; with full capacity of seats, partial capacity or without seats.

There are two parts of the system, the fixed and the mobile. The fixed parts are the tracks flush with the ground level. The mobile part is made up of metal carriages that slide along the tracks, which support rigidly groups of up to 12 seats, mounted on an metal beam, without bending, turning or twisting.

The beam where the seats are fixed, gives maximum rigidity to the system, a quality that, together with the stability provided by the two carriages where they are mounted, offers a similar comfort to the one provided by any fix-foot seat.

## MINKUANG FOLDING STAGE SYSTEM

### Minkuang Folding Stage System - 2 FOLDED

For architects, venue planners, and facility managers — flexibility is often constrained by structural limits. Traditional folding stages flip upward, meaning stage dimensions are dictated by ceiling height.

#### MFS changes that.

Our electric folding stage features a unique fold-as-it-rises mechanism, allowing the stage to be installed in spaces where ceiling height would otherwise limit size. It deploys and retracts at the touch of a button — folding completely against the wall to free up floor space.

#### Key benefits:

- No ceiling height limitation on stage size
- Zero footprint when stored
- One-button electric operation
- Ideal for multipurpose venues
- A stage that truly adapts to your space.

Your space, fully flexible.

# MWS

## MINKUANG WHEEL SYSTEM

MWS - The Minkuang Wheel System stands out with its light design and multidirectional built-in wheels, offering a unique and versatile solution. This system is ideal for venues requiring quick and easy adaptation to multiple activities.

Quick and easy to set up, the wheels of this system provide an easy movement of the entire row and with a simple lever system is possible to locate the seats in the desired position of the space.

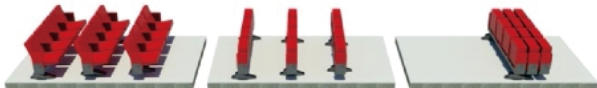

This system does not need permanent fixing points in the floor, this enables endless configurations for the same space and it becomes the perfect solution for multipurpose spaces where different kind of activities take place.

It is a perfect solution when we are facing a space which has ample depth for more seating rows, but limited ceiling height. With this system you can have few more rows at the front.

The concept offers the feature of storing the rows in a reduced space by grouping them along the back wall or under the stage or a platform.

The strong structure design allows great flexibility to create different configurations of up to a maximum of 7 seats. These groups are supported by two well built metal feet with two wheels that allow 360° rotation.

The system is activated by a lever that is inserted through the back of the foot, and once it is activated, the system folds or unfolds the wheels.

## MINKUANG REMOVABLE SEATING

### Ready to Redefine Your Space? The Chair That Transforms Your Space!

Tired of bulky chairs that limit your creativity? We are offering — the ultimate portable event chair designed for flexibility and smart storage!

- Adapt Any Layout: Rearrange rows, clusters, or solo seats in seconds. Perfect for theaters, events, classrooms, or pop-up venues!
- Space-Saving Magic: Fold it down to a slim profile (almost as thin as your phone!). Store 50 chairs in the space of 10.
- Built to Last: Lightweight yet sturdy frame + weather-resistant materials. Indoor or outdoor? No problem!
- Comfort Meets Practicality: Cushioned seat + ergonomic backrest. Because "portable" shouldn't mean "uncomfortable."

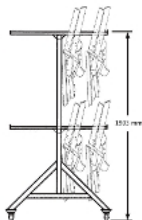

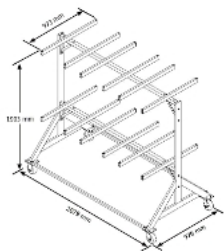

### Need a Quick Change?

Hosting a concert today and a workshop tomorrow? With HANDY, your space evolves as fast as your ideas do. Storage? Effortless. Stack' em, roll' em, tuck' em away. More room for what really matters.

People Are Saying:

"Finally, a chair that doesn't fight my event plans!"  
— Sarah, Event Planner

"From 200 seats to empty floor space in 10 minutes. Genius!"  
— Mark, Theater Director
